

--- WARNING --- VERY IMPORTANT !

DO NOT ATTEMPT TO CHARGE YOUR SYSTEM, BATTERY OR TRANSMITTER UNTIL YOU HAVE READ THIS NOTICE!

On both receivers and transmitters equipped with a ROUND miniature Charging Jack proceed as follows:

1. Insert charge plug on charger QUICKLY into charge jack.
2. Make certain that upon insertion the plug is FULLY SEATED against the Charge Jack.

Failure to observe these precautions could result in a short in the battery/charging circuits and cause wire and/or battery burn out. With a little care this problem will never occur.

EQUIPMENT WARRANTY DOES NOT COVER IMPROPER CHARGE PROCEDURES.
