DIGITAL THREE

\$299⁵⁰

Now, you can fly an economically priced three channel Proportional System which operates on the Digital Principal. The F & M Digital-3 uses the same proved digital technique which for three years have made the Digital-5 so widely accepted. The Digital-3 offers the F & M Fail Safe feature which protects your airplane against interference and loss of signal. The servos are now being fabricated by F & M using special F & M circuit features. At your option, the Digital-3 can be set up to offer coupled aileron and rudder. The Digital-3 is supplied complete with transmitter, receiver, three servos, both transmitter and receiver battery packs & chargers, switch harness and Aileron-Rudder coupling plug. The system is available at your local dealer.
